- Engaged in literature reviews, data interpretation, and thematic analysis to support ongoing research initiatives.

PROJECTS

Business Intelligence Analyst · [GitHub](#) Oct 2025 - Nov 2025

Bank Muamalat x Rakamin Academy (Project-Based Virtual Internship)

- Mapped entity relationships and primary keys across 4 relational datasets, with no orphan keys found.
- Built a master table in Google BigQuery using multi-table SQL JOINS, integrating 3,339 orders (11,654 units sold) and cleaning price and email fields.
- Designed a Looker Studio sales dashboard covering \$1.75M in total sales, showing Robots and Drones as about 70% of revenue and Washington as the top city (\$55,382).
- Delivered five data-backed recommendations, including recovering Robots sales (-15.4% in 2021) and retaining declining cities.

Kimia Farma x Rakamin Academy (Project-Based Virtual Internship)

- Imported and integrated 4 datasets (transactions, products, inventory, branch offices) into Google BigQuery covering 2020-2023 with 672,458 total transactions.
- Wrote advanced SQL queries using CTEs, LEFT JOINs, and CASE WHEN logic to compute nett sales and gross profit margins by product price tier.
- Built a Looker Studio dashboard revealing Rp321.17B in nett sales and Rp91.21B in nett profit across 264,601 distinct customer names and 150 products.
- Identified Jawa Barat as top-performing province (Rp94.87B sales, 198,723 transactions).
- Completed with average score of 91.56 (Excellent).

SKILLS

- Technical: SQL (Google BigQuery), Google Looker Studio, Microsoft Excel, Google Sheets, Data Visualization, Data Cleaning, Python (Basic), HTML
- Research: Qualitative & Quantitative Research Methods, Literature Review, Thematic Analysis, Academic Writing
