

REFA DEFANDA WITANTO

Malang, East Java, Indonesia | refadfnada@gmail.com | [LinkedIn](#) | [Google Scholar](#)

SUMMARY

International Relations undergraduate at Universitas Brawijaya with hands-on experience in data analytics, SQL, and business intelligence. Skilled in Google BigQuery, Looker Studio, Microsoft Excel, and statistical analysis. Demonstrated ability to build data pipelines, construct dashboards, and translate complex datasets into strategic insights across pharmaceutical and banking sectors.

EDUCATION

Universitas Brawijaya - Malang, East Java
Bachelor of International Relations, 3.53/4.00

Aug 2023 - Aug 2027 (Expected)

ORGANIZATIONAL EXPERIENCE

Veritas Institute of Politics
Research Fellow, Social Sciences & Humanities Department

Dec 2024 - Present

- Participated in a Research Project with Lecturers from the International Relations and Political Science Department at Universitas Brawijaya.
- Authored 5+ policy and socio-political articles published on Veritas Institute of Politics platform.
- Strengthened research competencies through capacity-building in qualitative and quantitative research methods.
- Engaged in literature reviews, data interpretation, and thematic analysis to support ongoing research initiatives.

PROJECTS

Business Intelligence Analyst · [GitHub](#)
Bank Muamalat x Rakamin Academy (Project-Based Virtual Internship)

Oct 2025 - Nov 2025

- Mapped entity relationships and identified primary keys across 4 relational datasets (Customer, Orders, Product, ProductCategory).
- Constructed a master table in BigQuery using multi-table SQL JOINS integrating 11,654 transaction records.
- Built a sales performance dashboard identifying Robots and Drones as top revenue categories and Washington as highest-revenue city (total sales: 55,382).
- Delivered strategic recommendations on product portfolio segmentation, geographic marketing, and data-driven customer retention via CRM.

Big Data Analytics · [GitHub](#)
Kimia Farma x Rakamin Academy (Project-Based Virtual Internship)

Apr 2025 - May 2025

- Imported and integrated 4 datasets (transactions, products, inventory, branch offices) into Google BigQuery covering 2020-2023 with 672,500+ total transactions.
- Wrote advanced SQL queries using CTEs, LEFT JOINS, and CASE WHEN logic to compute nett sales and gross profit margins by product price tier
- Built a Looker Studio dashboard revealing Rp346.96M in nett sales and Rp98.54M in nett profit across 264,600+ customers and 150 products.
- Identified Jawa Barat as top-performing province (Rp102.5M sales, 198,700 transactions) and surfaced service quality mismatch at 5 high-rated branches.
- Completed with average score of 91.56 (Excellent)

Data Analyst

Mar 2025 - Apr 2025

Dsarea (digitalskillsarea) (Project-Based Online Program)

- Applied advanced Excel functions (Index-Match, concatenation, database functions) for structured data analysis.
- Conducted data cleaning, exploratory data analysis, and basic-to-intermediate machine learning tasks.
- Performed statistical hypothesis testing including t-test, ANOVA, chi-square, Wilcoxon, and Kruskal-Wallis tests.
- Analyzed parametric and non-parametric data distributions and descriptive statistics.

SKILLS

- Technical: SQL (Google BigQuery), Google Looker Studio, Microsoft Excel, Google Sheets, Statistical Analysis, Data Visualization, Data Cleaning, Python (Basic), HTML
- Research: Qualitative & Quantitative Research Methods, Literature Review, Thematic Analysis, Academic Writing
